

**SCHOOL DISTRICT COMMITMENT TO LEARNING RESULTS**

The Islesboro Central School Department hereby adopts Maine’s system of Learning Results, including the *Guiding Principles*. The system of Learning Results is intended to serve as a foundation for education reform, including the standards-based system of learning and assessment of student achievement. The Board recognizes that the legislative intent of the Learning Results is to provide children with schools that reflect high expectations and create conditions where these expectations can be met.

The School Board understands that implementation of the Learning Results and the mandate to provide all students with equitable opportunities to meet the content standards of the system of Learning Results have broad implications for the school, including curriculum, budget, professional development, student assessment, professional evaluation, and graduation requirements. Therefore, the Board is committed to examining its policies and school system practices to ensure that they are consistent with the intent and goals of the system of Learning Results. This will require a concerted and coordinated effort involving the Board, the Superintendent, administrators, teachers, parents, students, and the community.

The Superintendent will be responsible for implementing the system of Learning Results, including development of appropriate administrative procedures. The Board further directs the Superintendent to report to the Board annually in regard to student achievement and progress toward implementing the Learning Results.
